JONES

April 6, 2010

I am Tom Jones, a Vice President of Waste Control Specialists and a resident of Andrews. We appreciate the Commission holding this hearing in Andrews to take comments from area residents.

I want to go on record as supporting the adoption of the import/export rules proposed by the Compact Commission. The state has already issued the license for the disposal of low level radioactive waste. The TCC rules only establish the parameters for the amount of waste to be received. Where it comes from isn't nearly as relevant to the rule-making process as establishing a process for governing the disposal, and setting the overall volumes.

We will submit our formal written comments at a later date.

Thank you

Tom W Jones III, VP Community Relations
Waste Control Specialists
