Re: Amended Petition to Export Class A Low-Level Radioactive (“LLRW”) Waste pursuant to Resolution adopted by the TLLRWDC on July 21, 2009

Dear Ms. Henderson:

Enclosed please find an “Amended Petition” to export Class A LLRW for permanent disposal in the non-compact, commercial, EnergySolutions, LLC, facility located near Clive, Utah, pursuant to an existing long-term disposal agreement with EnergySolutions, LLC for disposal of low-level radioactive waste from the Comanche Peak Nuclear Power Plant. The proposed expiration date of this “Amended Petition” for all forms of Class A LLRW is September 30, 2010. Further delays in operational readiness of the compact facility would likely compel the need to extend the term of the export permit accordingly.

We would be pleased to provide you with any further information upon your written request if the Commission needs more information in order to act upon the petition. Please contact me if there are any questions.

The enclosed Petition is being transmitted to you by electronic mail and regular mail. Please be so kind as to confirm receipt by return email to me at Robert.Knapp@luminant.com.

Respectfully submitted,

***Robert C. Knapp***

Robert C. Knapp
