3. Proposed out-of compact facility:

4. Person or entity who generated the waste:

5. Effective period for which petition is made:  
2011-2012
6. Total volume of Class A low-level/mixed radioactive waste projected to be exported during the time for which this petition is made, including outermost container that will be used for disposal (in cubic feet):  
11.51 ft<sup>3</sup> mixed waste  
7.5 ft<sup>3</sup> dry solids
7. Description of waste:  
Mixed waste, dry solids
8. Reason that the petition should be granted, including health and safety issues, emergency needs (if any) and the economic impact on the petition if the export petition is denied:

The waste is ready to go and is a radiation area. It reads 20 mR/hr at one foot. Continued storage instead of shipment off site will lead to unnecessary radiation exposure to staff. The facility is small and there are no locations where it could be stored away from where staff needs to work.

9. Certifications:

\*I hereby certify that the petitioner is licensed (for radioactive material) and or permitted (for hazardous waste), if applicable, and agrees to receive back the waste if its management or disposal is not allowed at the proposed disposal facilities.

\*I hereby certify that to the best of my knowledge the information provided herein is accurate and correct and that the low-level radioactive waste for which the export petition is submitted will be packaged and shipped in accordance with applicable state and federal regulations and is acceptable for disposal at the intended disposal facilities.

\*I hereby certify that I am authorized by my company, facility, or agency to commit it to each and every obligation and condition set forth herein.
