Name and Location of Proposed Treatment and /or Disposal Facility:

Energy Solutions Oak Ridge, TN for Incineration

Approximate Date of Proposed Exportation (if known): throughout the year

Waste Description: Used Oil/Water 10-12 x 55-gallon drums, Aqueous Liquids 6-8 x 55-gallon drums, Non-Hazardous Liquids in Vials 3-6 x 55-gallon drums

Oils, Aqueous Liquids and Liquids in Vials all require processing prior to disposal. As a small waste generator, SWRI does not have the means or an established process needed to prepare this waste for disposal at WCS. The processing required increases the risk of contamination, increases exposure of radionuclides to employees and creates additional waste volumes including doubling or tripling the present volumes, all of which results into much higher disposal costs. Burning the liquids is a method to eliminate the volume, cost and most importantly reduces risks.
