ATTACHMENT

Petition to Export Low-Level Radioactive Waste

1. Petitioner: Bionomics, Inc. of behalf of:

Peloton Therapeutics Dallas, TX

2. Persons to be contacted:

Bionomics, Inc. John McCormick 865-220-8501

3. Proposed out of Compact Disposal Facility:

Waste will be incinerated at the Energy Solutions facility in Oak Ridge, Tennessee with any ash shipped to Energy Solutions burial site in Clive, Utah.

4. Entity who generated the waste: Peloton Therapeutics

5. Effective Period: One Year

6. Specified Amount: approximately 150 pounds of Dry Active Wastes (DAW) and Animal Carcasses.

7. Description of the wastes: DAW and Animal Carcasses requiring processing by incineration

8. Reason that petition should be granted:

Client has limited space and needs to make regular shipments of their waste, typically less than 50 pounds at a time. The WCS Waste Acceptance Criteria Section 3.3.3.2 indicates "Incineration is the preferred method of treatment for biological, pathogenic or infectious waste". Due to the small volumes of Biological Wastes shipped at any one time, it is impossible to economically segregate Texas waste from other waste generators as part of the incineration process. Therefore we are in need of an Export Permit for this waste.

9. Certifications:

- I hereby certify that the Petitioner is licensed (for radioactive materials) and/or permitted (for hazardous wastes), if applicable, and agrees to receive back the waste if its management or disposal is not allowed at the proposed disposal facility.
- I hereby certify that to the best of my knowledge the information provided herein is accurate and correct and that the low-level radioactive waste for which this Export Petition is submitted will be packaged and shipped in accordance with applicable state and federal regulations and is acceptable for disposal at the intended disposal facility.

- I hereby certify that I am authorized by my company, facility, or agency to commit it to each and every obligation and condition set forth herein.
