Texas Low-Level Radioactive Waste Disposal Compact Commission  
333 Guadalupe St. #3-240  
Austin, Texas 78701

Subject: Duke Energy Import Agreement TLLRWDC# 2-0027-00

Sirs & Madame:

Duke Energy's Brunswick Nuclear Plant previously submitted application to the Texas Low-Level Radioactive Waste Disposal Compact Commission earlier this year and was approved under TLLRWDC # 2-0027-00 for importation of Radioactive Waste. In the course of time between the application and actual preparation for disposal, the size of the disposal container changed slightly causing a discrepancy between the requested volume to import and the actual volume of the disposal container finally prepared for disposal.

This letter requests revision of the TLLRWDC approved volume for importation found in TLLRWDC# 2-0027-00. The approved waste volume is listed as 120.3 Cubic Feet. Duke Energy requests TLLRWDC approve an additional 4.9 Cubic Feet for this Import Agreement # 2-0027-00 for a total approved volume of 125.2 Cubic Feet.

We respectfully request your consideration in this matter. Should you require more information please contact me directly at 910-457-2125 or at [scott.taylor4@Duke-Energy.com](mailto:scott.taylor4@Duke-Energy.com).

Sincerely,

A handwritten signature in black ink that reads 'Raymond S. Taylor' with a long horizontal flourish extending to the right.

Raymond S. Taylor  
Radiation Protection Supervisor  
Brunswick Nuclear Plant
