Re: Request for an extension to Bionomics Import Agreement

Dear Mr. Wilson,

Bionomics would like to amend our Import Agreement # 2-0032-03 from an expiration date of August 31, 2014 to September 30, 2014. We would also like to increase our disposal volume an additional 37.5 cubic feet from the approved volume of 52.5 ft³ to a total of 90 ft³.

We have collected and are continuing to collect a large number of Sealed Sources under the SCATR program for disposal at the Texas Compact facility. While we will make a shipment of these Sources prior to the current August 31, 2014 deadline, we do have Sources that are currently being collected that will not be ready for the August shipment. The end of the Federal fiscal year is September 30 and the remaining Sources collected need to be disposed prior to this date in order to be counted under this fiscal year's program.

A request for Importation has been submitted and should be heard at the September 25 meeting. While we do anticipate that approval will be given on this date, we need more than 5 days to schedule a shipment and without an active Agreement a shipment cannot be scheduled. An extension would allow us to bury the current years Sources by September 30.

Feel to contact me with any questions regarding this request.

Sincerely,

A handwritten signature in black ink that reads 'John McCormick'. The signature is written in a cursive style with a large, looping initial 'J'.
