Re: Amendment to Bionomics Import Agreement #2-0074-01

Dear Mr. Hurley,

Bionomics would like to amend our Import Agreement # 2-0074-01 to increase the total Radioactivity in Curies that we can import as well as increased amounts of activity for the Radionuclides C-14, Tc-99 and I-129. Our Sealed Sources collection on behalf of the SCATR program requires an increase to our previously requested amounts.

Please amend our current agreement to reflect changes in Article II in Section J. to the levels listed below.

**(b) Waste Radioactivity in Curies from 125 Curies to 200 curies**

**(g) Radionuclides:**

C-14 from 200.0 millicuries (mCi) to 1,500 mCi

Tc-99 from 10,000 microcuries (uCi) to 100,000 uCi

I-128 from 1,000,000 nanocuries (nCi) to 10,000,000 nCi

Feel to contact me with any questions regarding this amendment.

Sincerely,

A handwritten signature in black ink, appearing to read 'John McCormick', written over a circular scribble.
