Subject: Application for Importation of Non-Party Low-Level Radioactive Waste

Dear Mrs. Ing:

Please find enclosed an application from Qal-Tek Associates, LLC to import Class C domestic sealed sources and special form material for disposal at Waste Control Specialists, LLC facility in Andrews, Texas. Qal-Tek Associates respectfully requests that the Petition be considered by the Texas LLRW Compact Commission at its next meeting. Qal-Tek Associates understands that the application requires export permits from the Southwest, Central and Rocky Mountain (if applicable) compacts and written authorization from the generator authorizing Qal-Tek Associates to act on behalf of these generators for disposal of their radioactive material which were not able to be reutilized. Copies of the approved petitions and copies of the letter from the generator (Qal-Tek relinquishment of ownership and authorization to dispose -ROO) will be submitted as evidence to satisfy the Commission prior to each shipment over the next year of this authorization. This import disposal request represents a continuation of reducing our legacy inventory, which did not find a valid reuse, using previously approved documentation (ROO) and for newer materials with conforming documentation as requested in the application.

TERM SHEET**

**Agreement for Importation of Nonparty Low-Level Radioactive Waste into the Texas
Low-Level Radioactive Waste Disposal Compact for Disposal**

This Agreement for Importation of Nonparty Low-Level Radioactive Waste ("Agreement") is dated Aug. 28, 2015, by and between Qal-Tek Associates, LLC ("Generator") and the Texas Low-Level Radioactive Waste Disposal Compact Commission ("Commission") (collectively the "Parties").

I. RECITALS

WHEREAS Texas is the host state for the Texas Low-Level Radioactive Waste Disposal Compact ("Compact"), which requires the state to develop a facility for the disposal of low-level radioactive waste generated within the Compact's party states; and

WHEREAS in compliance with the Compact and with state law, the Texas Commission on Environmental Quality ("TCEQ") issued a license to Waste Control Specialists LLC ("Compact Facility Operator") to construct and operate a Compact Waste Disposal Facility ("Compact Facility") in Andrews County, Texas for the disposal of low-level radioactive waste for the Compact; and

WHEREAS the Texas Legislature has authorized the Compact Facility Operator to accept for disposal at the Compact Facility low-level radioactive waste from waste generators located outside of the Compact party states in accordance with the Compact Facility license and to the extent the acceptance of such imported waste does not diminish the disposal volume or curie capacity available to Compact party states; and

WHEREAS Chapter 403, Section 3.05(6) of the Texas Health and Safety Code authorizes the Commission to enter into an agreement with any person, state, regional body, or group of states for the importation of low-level radioactive waste into the Compact for management or disposal, provided that the agreement receives a majority vote of the Commission; and

WHEREAS the Texas Legislature has established additional terms and conditions in Chapter 401 of the Texas Health & Safety Code that if satisfied ensure that the importation of low-level radioactive waste will be in the State's public interest; and

WHEREAS Generator has filed an Application for Importation of Nonparty Low-Level Radioactive Waste ("Application") with the Commission; and

WHEREAS the Commission has processed and considered Generator's Application in accordance with applicable requirements, and a majority of the members of the Commission approved the Application and voted to enter into this Agreement; and

WHEREAS in voting to approve Generator's Application and to enter into this Agreement, the Commission considered all relevant statutory and regulatory considerations, including, but not limited to: (a) the volume, type, physical form, and total activity (radionuclide- specific activity, if needed) of the waste proposed for importation as identified in the Application; (b) the policy and purpose of the Compact; (c) the existence of unresolved violations pending against Generator with any other regulatory agency with jurisdiction to regulate radioactive material, and any comments by the regulatory agency with which Generator has unresolved violations; (d) any unresolved violation, complaint, unpaid fee, or past due report that Generator has with the Commission; (e) whether, by acceptance of this waste for disposal, the Compact Facility will remain below the applicable annual and total volume and curie capacity disposal limits set forth in Sections 401.207(e), (e-1) (if applicable), and (f)(1) of the Texas Health and Safety Code; and (f) other factors that the Commission has deemed relevant to carry out the policy and purpose of the Compact and Chapters 401 and 403 of the Texas Health and Safety Code.
