

TLLRWDCC #2-0103-01

FIRST AMENDMENT

TO THE AGREEMENT BETWEEN
ENTERGY OPERATIONS, INC. – RIVER BEND STATION (“ENTERGY-RIVER BEND”)
AND
THE TEXAS LOW-LEVEL RADIOACTIVE WASTE DISPOSAL COMPACT COMMISSION
 (“COMMISSION”)

SIGNED BY ENTERGY – RIVER BEND ON DECEMBER 8, 2015

AND BY

THE COMMISSION ON NOVEMBER 25, 2015

Article II.J (b) Waste Radioactivity in Curies is amended to read as follows:

(b) Waste Radioactive in Curies authorized (1) unconditionally and (2) conditionally:

(1) Waste Radioactivity in Curies unconditionally authorized: 40,000

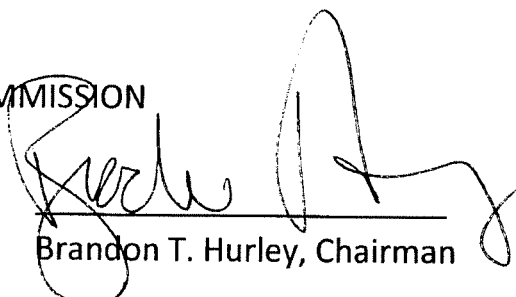

(2) Waste Radioactivity in Curies conditionally authorized: 40,000

- a. No shipments may be made under Article II.J(b)(2) of this Agreement without further authorization from the Commission.
- b. No less than 15 days before a shipment is made under Article II.J(b)(2) of this Agreement, the Generator shall provide the Commission a written notice containing evidence satisfactory to the Commission that a shipment will be made on the date proposed in the notice and that it will contain a specifically identified number of Curies. It is acknowledged that weather or other unforeseen conditions may cause a nominal delay of a shipment, but that delay shall not exceed 5 days, or a new condition removal letter will be required unless otherwise authorized by the Commission.
- c. No shipment will be made under Article II.J(b)(2) of this agreement until the Generator has received a written communication from the Commission that: (1) it has received the notice from the Generator; (2) it is satisfied that the shipment will be made on the proposed date and that it will contain approximately the proposed number of Curies; and (3) the disposal of the waste listed in the notice will not cause the total number of Curies disposed at the Compact facility to exceed the maximum yearly allowances for that operating year.
- d. It is the understanding of the Generator that Article II.J(b)(2) of this Agreement is null and void and no further shipments can be made pursuant to Article II.J(b)(2) of this Agreement on or after the date during an operating year that the Facility has received low-level radioactive waste containing 275,000 curies.

No other provision of the agreement between Entergy-River Bend and the Commission is affected by this Second Amendment. This Amendment is effective as of the date of its approval by the Commission on February 4, 2016.
