RE: Import Agreement TLLRWDC #2-0346-00
Curie Release Letter #2

Dear Mr. Heard:

Pursuant to the condition expressed as a part of Article II.J. (c) of your Import Agreement TLLRWDC #2-0346-00 with the Texas Low-Level Radioactive Waste Disposal Compact Commission ("TLLRWDC"), I have received your request to dispose of irradiated hardware in the following five shipments:

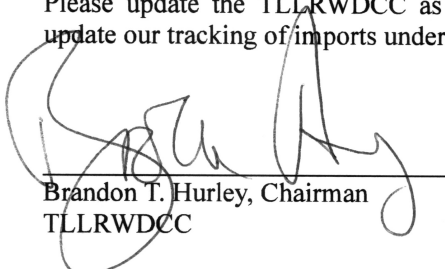

- The 3rd shipment is scheduled to be shipped on or about November 21, 2022, with a disposal volume 56.25 cubic feet with approximately 7,800 curies of activity. Now planned for on or about **February 2, 2023**
- The 4th shipment is scheduled to be shipped on or about December 13, 2022, with a disposal volume 56.25 cubic feet with approximately 6,100 curies of activity. Now planned for on or about **February 16, 2023**
- The 5th shipment is scheduled to be shipped on or about January 17, 2023, with a disposal volume 56.25 cubic feet with approximately 6,100 curies of activity. Now planned for on or about **March 2, 2023**

As of the date of this letter, there is sufficient capacity for importation during the State of Texas Fiscal Year to accommodate the shipment of an additional 12,200 curies and 112.5 cubic feet as requested in your email dated January 25, 2023. Thank you for updating us on the schedule for shipments. Shipment three has already been approved for curie release under your previous curie release letter issued on October 6, 2022. This letter does not authorize the importation to the Compact Facility in Andrews County of any cubic feet or curies of low-level radioactive waste beyond the 12,200 curies and 112.5 cubic feet of irradiated hardware requested in the first three shipments..

Therefore, you are authorized as of the date of your receipt of this communication to import from Entergy Grand Gulf Nuclear Station to the Compact Facility in Andrews County, Texas 12,200 curies and 112.5

cubic feet of irradiated hardware described in agreement TLLRWDC #2-0346-00. This shipment is approximately 14% of the volume and 7.6% of the activity specified in Article II.J. of agreement TLLRWDC #2-0346-00. With this letter, Entergy Grand Gulf Nuclear Station has remaining 498.75 of 780 cubic feet and 127,600 of 160,000 curies authorized to be shipped conditionally under agreement TLLRWDC #2-0346-00.

Please update the TLLRWDC as you send shipments and schedule for future shipments so we may update our tracking of imports under your agreement.

Brandon T. Hurley, Chairman
TLLRWDC
