RE: Import Agreement TLLRWDC #2-0417-00  
Curie Release Letter #1

Dear Ms. Heard:

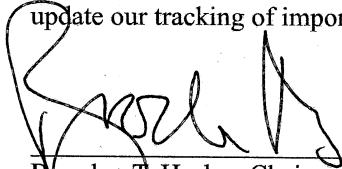

Pursuant to the condition expressed as a part of Article II.J. (c) of your Import Agreement TLLRWDC #2-0417-00 with the Texas Low-Level Radioactive Waste Disposal Compact Commission ("TLLRWDC"), I have received your request to dispose of irradiated hardware in the following shipments:

- The 1st shipment is scheduled to be shipped on or about August 8, 2024, with a disposal volume 56.25 cubic feet with approximately 7,760 curies of activity.
- The 2nd shipment is scheduled to be shipped on or about August 21, 2024, with a disposal volume 56.25 cubic feet with approximately 6,610 curies of activity.

As of the date of this letter, there is sufficient capacity for importation during the State of Texas Fiscal Year to accommodate the shipment of an additional 27,200 curies and 168.75 cubic feet as requested in your letter dated July 17, 2024. This letter does not authorize the importation to the Compact Facility in Andrews County of any cubic feet or curies of low-level radioactive waste beyond the 14,370 curies and 112.5 cubic feet of irradiated hardware requested in the shipments.

Therefore, you are authorized as of the date of your receipt of this communication to import from Entergy Grand Gulf Nuclear Station to the Compact Facility in Andrews County, Texas 14,370 curies and 112.5 cubic feet of irradiated hardware described in agreement TLLRWDC #2-0417-00. This shipment is approximately 28% of the volume and 16.9% of the activity specified in Article II.J. of agreement TLLRWDC #2-0417-00. With this letter, Entergy Grand Gulf Nuclear Station has remaining 287 of 400 cubic feet and 70,630 of 85,000 curies authorized to be shipped conditionally under agreement TLLRWDC #2-0417-00.

Please update the TLLRWDCC as you send shipments and schedule for future shipments so we may update our tracking of imports under your agreement.

---

Brandon T. Hurley, Chairman  
TLLRWDCC
