Stephen E. Raines
Executive Director
Texas Low Level Radioactive Waste Disposal Compact Commission

Re: 2024-2025 Import Agreement – Amendment Request

Dear Stephen,

Bionomics has seen an increase in our waste collections, and we are requesting an additional 350 cubic feet and an additional 100 Curies to accommodate the increase for this fiscal year.

Additionally, our initial import application indicated that sealed sources were not the only waste streams to be covered; we are therefore requesting to add “DAW” into the Waste Description and Current Location of the Waste.

Every year, we estimate in advance our needs for the following year and typically use up most all of the activity and volume requested. We do not speculate on our needs and this upcoming year is no different.

Please let me know if you can accommodate this request and if there is anything we need to provide.

Sincerely,

John McCormick
Vice President
Bionomics, Inc.
