

MOTION PASSED UNANIMOUSLY WITH ALL PRESENT
NOVEMBER 9, 2011

MOTION IN RESPONSE TO WCS PETITION FOR RULE-MAKING

In response to the petition of Waste Control Specialists (“WCS”), I move that the Texas Low-Level Radioactive Disposal Compact Commission (“Compact Commission”) initiate a rule-making process to consider the adoption of amendments to rules related to import of waste from a non-compact generator by holding a public workshop session open to any and all participants on November 22, 2011 for the purpose of the Compact Commission receiving information with respect to the matters outlined in item 1 in the Compact Commission’s Agenda for its meeting on November 9, 2011, along with any other relevant information that might guide the Compact Commission in any rule or rules that it might propose for publication in the near future.

I further move that the Compact Commission express its intention to develop a rule or rules or amendments to rules related to importation of waste for comment and proposed adoption and publication in the Texas Register at the earliest feasible date.
