RE: Import Agreement TLLRWDCC #2-0191-00
Curie Release Letter #2

Dear Mr. Long:

Pursuant to the condition expressed as a part of Article II.J. (c) of your Import Agreement TLLRWDCC #2-0191-00 with the Texas Low-Level Radioactive Waste Disposal Compact Commission ("TLLRWDCC"), I have received your request to dispose of irradiated hardware in the following four shipments:

- On or about September 20, 2018, 56.25 cubic feet of waste with approximately 12,000 curies of activity
- On or about October 2, 2018, 56.25 cubic feet of waste with approximately 11,600 curies of activity
- On or about October 11, 2018, 56.25 cubic feet of waste with approximately 11,200 curies of activity
- On or about October 23, 2018, 56.25 cubic feet of waste with approximately 10,800 curies of activity.

As of the date of this letter, there is sufficient capacity for importation during State of Texas Fiscal Year 2018 to accommodate the shipment of 45,600 curies and 225 cubic feet as requested in your letter dated September 10, 2018. This letter does not authorize the importation to the Compact Facility in Andrews County of any cubic feet or curies of low-level radioactive waste beyond the 45,600 curies and 225 cubic feet of irradiated hardware requested.

Therefore, you are authorized as of the date of your receipt of this communication to import from Entergy Grand Gulf Nuclear Station to the Compact Facility in Andrews County, Texas 45,600 curies and 225 cubic feet of irradiated hardware described in agreement TLLRWDCC #2-0191-00. This shipment is approximately 66% of the volume and 46% of the activity specified in Article II.J. of agreement TLLRWDCC #2-0191-00. With this letter, Entergy Grand Gulf Nuclear Station has remaining 58.75 of

340 cubic feet and 41,600 of 100,000 curies authorized to be shipped conditionally under agreement TLLRWDCC #2-0191-00.
