**Name and Location of Proposed Treatment and /or Disposal Facility**

US Ecology Idaho, Grand View, ID

**Approximate Date of Proposed Exportation (if known)**

Periodically during petition term.

**Waste Description**

Low Level Class A, Bulk Dry Active Waste including; 1) cyclotron and associated components, 2) activated concrete blocks/debris, and 3) contaminated lead bricks.

**Justification for Exportation**

The waste consists of accelerator produced NARM waste including a cyclotron and associated components. For the waste to be accepted at the compact disposal site significant size reduction would be necessary. Substantial onsite process changes would be required to complete this size reduction. In addition to the need for increased manpower and training of personnel, the physical lay-out of the University of Texas Health Science Center does not support the sorting, size reduction, and processing that would be required for the WCS ALARA and Waste Acceptance Criteria.

**Does Applicant have any unresolved violation(s), complaint(s), unpaid fee(s), or past due report(s) with the Texas Low-Level Radioactive Waste Disposal Compact Committee?**

No.
