.002

Waste Classification

Class A

Name and Location of Proposed Treatment and /or Disposal Facility

Energy Solutions Bear Creek Incineration

Approximate Date of Proposed Exportation (if known)

2020

Waste Description

Biological Waste

Justification for Exportation

Biological Waste must be treated prior to disposal and the recommended and best available technology for this type of waste is incineration. Given the extremely small amount of material it would be a financial burden to develop a treatment for this waste within a laboratory environment. Additional handling of the waste will increase exposure to the workers and non-incineration treatment of the wastes will increase the disposal volume.

Does Applicant have any unresolved violation(s), complaint(s), unpaid fee(s), or past due report(s) with the Texas Low-Level Radioactive Waste Disposal Compact Committee?

No.

Does Applicant have any unresolved violation(s), complaint(s), unpaid fee(s), or past due reports associated with radioactive waste receipt, storage, handling, management, processing, or transportation pending with any other regulatory agency with jurisdiction to regulate radioactive material including, without limitation, the Texas Commission on Environmental Quality (TCEQ)?

No.

Applicant hereby certifies* the following:
The information provided herein is complete, accurate, and correct.
The low-level radioactive waste for which this Export Petition is submitted will be packaged and shipped in accordance with applicable state and federal regulations and is acceptable for disposal at the proposed disposal facility.
